DETAILED ACTION

Claims 23-39 are pending in the application.

Election/Restrictions

Applicants' election with traverse of Group I, and the species of Example 15 in the reply filed on August 2, 2004 is acknowledged. The traversal is on the ground(s) that: (1) the process (e.g., "method of use") claims should be rejoined if the products are ever found allowable; and (2) only one search would be required for both Group I and Group II.

All of Applicants' arguments have been considered but have not been found persuasive. Separate search considerations are involved for each of Group I and Group II as well as considerations under 35 USC § 112, first and second paragraphs and 35 USC § 103. Therefore, it would impose an undue burden on the Examiner and Patent Office's resources to examine the instant application in its entirety. Further, in accordance with M.P.E.P. §821.04 and *In re Ochiai*, 71 F.3d 1565, 37 USPQ 1127 (Fed. Cir. 1995), rejoinder of product claims with process claims

commensurate in scope with the allowed product claims will occur following a finding that the product claims are allowable. Until, such time, a restriction between product claims and process claims is deemed proper. Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution to maintain either dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

The requirement is still deemed proper and is therefore made FINAL.

Claims 35-39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions. Applicant timely traversed the restriction (election) requirement in the reply filed on August 2, 2004.

Information Disclosure Statement

The Information Disclosure Statement filed on May 3, 2004 has been considered by the Examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C.

112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 23-32 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 does not conform to M.P.E.P. 608.01(m) since each claim must end with a period and no other periods may be used elsewhere in the claims except for abbreviations {e.g., see the period after the definition of Z^1 and Z^2 , bottom of page 4}.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 and 6-14 of U.S. Patent No. 6,624,184. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claimed inventions is generically described in the claims of the patent. Compare, for instance, instant claim 23 and claim 1 of the patent. Especially note the first compound of instant claim 33

and the elected species of Example 15 in comparison to the compounds in column 76, lines 15, 16, 31 and 32, respectively (claim 12) in the patent.

The indiscriminate selection of “some” among “many” is *prima facie* obvious, *In re Lemin*, 141 USPQ 814 (1964). The motivation to make the claimed compounds derives from the expectation that structurally similar compounds would possess similar activity (e.g., an inhibitor of IMPDH). One skilled in the art would thus be motivated to prepare products embraced by the patent to arrive at the instant claimed products with the expectation of obtaining additional beneficial products which would be useful as inhibitors of IMPDH. The instant claimed invention would have been suggested and therefore, obvious to one skilled in the art. A strong case of *prima facie* obviousness has been established.
